

I Cleaned The World's Dirtiest Beach #TeamSeas

This is one of the dirtiest beaches in the entire world. And we're gonna pick up every single piece of trash on this beach. Starting with this water bottle.

One out of millions of pieces of trash. We did it! This will take forever. Bottle me up, baby. I'm hungry for your plastic. As you can see, this is taking forever.

Oscar, come on in. This is Oscar, a professional beach cleaner. Is this basically how you guys clean beaches?

Mainly, we do the big stuff first and then we bring a lot of people with sifters as well for the small stuff. You scoop it into this thing and then shake out the sand, and you got a bunch of trash. This right here is the first bag of trash. Hundreds more to go.

How do we do this quicker? We just need more people.

That seems simple. Can you clap for me? There you go! All the volunteers.

Okay guys, we're gonna clean this up using the bags. We're gonna clean this up. Groups of four! Groups of four in this area.

Part of me wanted to see if me and the boys could clean up this beach by ourselves, and the other part of me realizes that would've taken a year. I could've told you that.

Jimmy! Yeah? The ocean's putting more trash on the beach. There's so much underwear in the ocean. I'm enacting a new law. Thou shall not throw your underwear in the ocean.

Wait, did you guys already fill up a bag? Yeah. You guys are better than us. They are professionals to be fair.

After 12 hours of cleanup, this is what we managed to achieve, which isn't enough. Boys, bring it in. Tomorrow, I'm gonna bring in 10 times the volunteers. Tomorrow. Tomorrow.

It's now the next day. I'm helping. Nah, nah, nah. But as slowly as possible. Who's more bueno? Mark Rober or MrBeast? Mr. Beast.

Make sure you watch until the end of the video to find out how we're gonna pick up 30 million pounds of trash.

Thank you for coming to our country and help us with this initiative. That is really awesome. Right here. Right there. Stop. He's not stopping. I'm gonna move. In this bad boy is 6,000 pounds of trash.

And now we have 36,000 pounds of trash, which weighs the same as 3,000 cats or three T-rexes. Whichever you prefer.

While I was talking with some of the locals, they mentioned that there's a beach down the street that was also very dirty. So, I sent Nolan with a bunch of volunteers to go clean that beach as well.

There's a whole car bumper right here. There's a car bumper here? Did this come outta the ocean? People litter weird things. What type of trash have you seen along the beach? Most importantly, most commonly is plastics.

And we see that in every form on the beach here. They ended up removing 12,000 pounds of trash, which brought us up to a total of 50,000 pounds of trash from just two beaches.

Check out this power move. Watch this. Look at that! Is that how you want us to dump it? Yeah, dude, I'm taking one for the team. I'm a team player. Oh yeah. I don't even have to look. There you go, Mark. It actually kind of works. See?

And if you guys look over there, we're actually getting close to the end of the beach. This is what the beach looked like at the start of the video. And this is what it looks like with like 20% left. We're getting there. We're doing it!

Unfortunately, between the ocean washing up trash to the beach and rivers bringing in new trash from the mainland, obviously this beach is gonna get dirty again. But with you guys' help, we can stop a much bigger issue.

We're almost done, Jimmy. I know! Four straight days of picking up trash. And just like that, we removed over 60,000 pounds of trash from the world's dirtiest beach.

And even though this 60,000-pounds of trash we picked up might seem impressive, there is sadly way too much trash still in the ocean.

Two years ago, we crushed our goals with Team Trees and planted 20 million trees. And now it's time to do it again. Which is why we, along with hundreds of other creators, are launching Team Seas. And for every \$1 you guys donate, like this, one less pound of trash will be in the ocean.

But what if I wanted to donate \$10, Jimmy? I conveniently have 10 pounds of trash right here that is now out of the ocean. Boom. Gone.

You get the point. One dollar donated is one less pound of trash in the ocean. And I'd like to personally thank YouTube Originals for supporting Team Seas and helping us fund it. They're gonna be matching the first \$400,000 worth of donations, dollar for dollar.

And we wanna remove 30 million pounds of trash from the ocean. Which is just so freaking audacious. This only happens if we all work together. Half the money we raise is going towards funding volunteer beach cleanups like we did here today, all across the world, as well as literally fishing trash out of the ocean.

And the other half will be used for these trash-eating robots that pick-up trash 24 hours a day, 365 days a year, from rivers that flow to the ocean.

Go to teamseas.org or click the donate button below this video right now. \$1 equals one less pound of trash in the ocean.

Making a real change like this isn't gonna be easy. Go donate right now and help us remove 30 million pounds of trash from the ocean before the end of the year.

Let's show the world that we want a clean ocean. (soulful music) What are you doing? Get outta here. Go donate.

What is the main goal of the beach cleaning effort?

- a. To remove 30 million pounds of trash from the ocean
- b. To pick up all the trash on one of the dirtiest beaches in the world
- c. To make the beach look cleaner
- d. To clean a different beach down the street

Answer: b

Who is Oscar?

- a. One of the volunteers
- b. A YouTube creator
- c. A professional beach cleaner
- d. The person who started Team Seas

Answer: c

What is the main method used for cleaning the beach?

- a. Only volunteers
- b. Big machines
- c. Big machines and volunteers with sifters
- d. Only professionals

Answer: c

What is the goal of Team Seas?

- a. To clean all the beaches in the world
- b. To remove 30 million pounds of trash from the ocean
- c. To stop the ocean from washing up trash
- d. To stop people from littering

Answer: b

Who is matching the first \$400,000 worth of donations for Team Seas?

- a. The volunteers
- b. YouTube Originals
- c. The people who started the effort
- d. The locals

Answer: b

What is the most common type of trash seen on the beach?

- a. Underwear
- b. Car bumpers
- c. Plastics
- d. Trees

Answer: c

How much trash was removed from the world's dirtiest beach?

- a. 36,000 pounds
- b. 3,000 pounds
- c. 12,000 pounds
- d. 60,000 pounds

Answer: d

What is the main way to help with the goal of Team Seas?

- a. Donating money
- b. Volunteering to pick up trash
- c. Planting trees
- d. Stopping the ocean from washing up trash

Answer: a

Who is taking "one for the team" with the trash dump?

- a. Jimmy

b. Mark Rober

c. Mr. Beast

d. Nolan

Answer: b

Who is thanking YouTube Originals for supporting Team Seas?

a. Jimmy

b. Mark Rober

c. Mr. Beast

d. Nolan

Answer: a
